HELLO!

Big Posters deserve a Big Welcome!

Whoever said “size doesn’t matter” was clearly talking nonsense. Of course it matters. Although, its just as important where you stick it. And this guide is packed with Big Posters and special ways to stick them up.

Think about all the places your customers go. Your store. Your reception. Past your windows. Your waiting room. Your till point. Your warehouse. Your toilets. All of these are potential points of contact. (Bear with us about the toilets). They’re places you could be talking to your customers... without being there.

So whatever you’ve got to say, we’ve got a poster to suit. However you want to say it, we’ve got a way of displaying it effectively. Check out our poster frames, lightboxes, banner stands and pop-up displays.

DON'T MAKE AN EXHIBITION OF YOURSELF

If you're exhibiting at a show follow these tips to make sure it all goes to plan...

Put someone in charge

There's a lot of detail to attend to. Electricians, furniture folk, health & safety certificates. Make sure one person is responsible.

Know your deadlines

It's no use ordering brochures the day before the exhibition, or trying to put up your posters half way through the first day. Pay attention to supplier leadtimes and build them into your plan.

Don't sleep in your car

Hotels get booked up early – don't leave it to the last minute. Creased suit = bad news.

Check every last detail, twice

A spelling mistake in two feet high letters will make you feel sick.

Remember why you're there

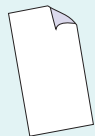

To meet new customers. Record all their details and treat their business cards like solid platinum.

Look the business

You don't need the biggest stand – just have the best graphics. Get our designers involved early and you'll be impressed with what we can add.

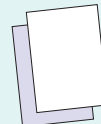

EXHIBITION TICK LIST

This guide will help you decide how your exhibition stand should look. Other customers have benefited from the following additional items – check out our full Buying Guide for details.

BIG POSTERS CONTINUED

If you're not using **Big Posters**, then you're probably losing out. Use them or lose out. That sounds kind of catchy. Anyway, there's lots of ways you can benefit from posters. Put them in your windows to attract passing trade. Put them in reception and tell existing clients about other stuff you do. Put them in your staff room to reinforce your goals. Put them in your corridors to brighten them up. Put them just about everywhere!

EVOLUTION POP-UP DISPLAY KITS

FROM **£196** SEE OVER

EVOLUTION POP-UP DISPLAYS

Evolution Quick Pop-up Display Kits are great for point-of-sale and for use at exhibitions. Why *Quick*? They're assembled in just a few minutes. Easily too – it's nearly all magnetic. Compact to transport, massive when erect. Each Pop-Up Display plus Posters kit consists of front flat panels (one to five – see below) and two end panels.

What's all this '3x4' nonsense?

It's the way of describing the size. See the photo on previous page? It's 3 "sections" high by 2 "sections" wide. That's a 3x2 stand. A 3x3 stand is 3 high by 3 wide. You get the idea.

Lamination

If you intend using the same posters more than once, we'd recommend you matt laminate them to make them more durable. Just add £50 per poster.
